## **About the 9/25 Zoom Meeting**

Dr. Ming Wang, the world-renowned ophthalmic surgeon, will speak at Yunhe Club (via Zoom) on Monday, September 25th at 8:30 PM (Eastern Time). He will share with us the stories behind the upcoming movie, "SIGHT," which is based on his life story, and the innovative eye surgery technique depicted in the movie. We would like to invite you to join the meeting to meet Dr. Wang.

The film "SIGHT" tells the inspiring story of Dr. Wang, who had to play the Chinese erhu violin and dance to avoid being sent away to labor camps during the Cultural Revolution. He finally graduated from the University of Science and Technology of China (USTC) and eventually made his way to America with only \$50.

He worked diligently to earn MD (magna cum laude) and PhD degrees from Harvard Medical School and MIT while facing racial discrimination during his academic journey. Through perseverance and hard work, he invented an invisible membrane eyeglass technology that restores vision to the blind. This technology has been granted a US patent and is now widely adopted by tens of thousands of ophthalmologists in almost every country, restoring sight to millions of blind individuals worldwide. His journey is a touching inspirational story, standing as a symbol of an individual's achievements in the world of ophthalmology and science.

Dr. Wang also established a foundation that has helped orphaned children from various countries regain their sight, bearing witness to the intersection of Christian faith and science. The movie "Sight" recently won the top award (Best Picture) at the International Christian Visual Media (ICVM) Awards.

In light of Dr. Wang's remarkable journey and incredible achievements, we cordially invite you to join us on Monday, September 25th at 8:30 PM (Eastern Time) via Zoom for what promises to be an inspiring and enlightening talk. Don't miss this unique opportunity to connect with Dr. Ming Wang and learn more about the extraordinary stories behind the movie and groundbreaking eye surgery techniques.

For more information, please contact Yauwu Tang at 508-333-0633.

# 王明旭教授, MD, PhD
